

Windshield hold down tabs

Designed specifically to hold both flush mounted and factory windshields in place. It is hard to see in this photo, but the tabs are beautifully shaped and are radiused with a 45 degree bevel around the entire circumference of the tab. Made from .20" 5052 aluminum, they are bendable yet very strong. Need five per car two at the bottom and three at the top.

Lightweight Door Latch Kits for 911's

Designed by multi-race winner Gary Boss, these door latch kits compliment the conversion to fiberglass doors. The entire kit weighs less than a single factory striker plate. Extremely secure and positive in action. The kit comes complete for two doors and all necessary hardware is included.

Plexus Plastic Cleaner Protectant and Polish

The most effective product available for cleaning, protecting, and polishing all kinds of plastic. Plexus is easier to use than ordinary cleaners. Its convenient aerosol applicator prevents dripping, leaking, evaporating, and coagulating at the tip of the nozzle (as is common with pumps and squeeze bottles). To use Plexus, simply spray and wipe - no buffing, no mess, and no waste. Plexus is easy to use and contains no CFCs .

Plexus protects plastic more effectively than ordinary cleaners. Because Plexus seals the pores in plastic surfaces with a micro-thin layer of shiny, protective wax, plastic becomes resistant to debris, oil, scratches, and eventual yellowing. And its anti-static properties repel dust and lint.

Care and Feeding of Lexan windows

Plastic window maintenance is easy if you follow a few simple rules. Do not use any abrasive cleaners, household spray wax or solvent based cleaners. Extremely dirty windows should be gently washed with lukewarm water and a soft cotton towel.

Caution: Plastic windows react adversely to some liquids commonly used around race cars.

- Liquid thread lockers are especially bad.
- Acetone, MEK or other strong solvents dissolve both acrylic and polycarbonate.
- Cleaners that contain ammonia!
- Rain-X® or similar products.
- Windshield wiper use causes no harm to the windshield as long as the windshield is clean and the wiper is not allowed to run "dry", "squeak" or "chatter".

Master Battery Switch

Master Battery Switch has been designed to eliminate the possibility of the Alternator Circuit being damaged due to heavy voltage surge, that can occur with the use of a heavy duty single circuit On/Off Switch. When turned to the Off position the engine will be automatically stopped due to the secondary switch function whereby the ignition circuit is cut. This prevents engine "Run On" and is a vital safety factor especially in competition use. Master Battery Switch is also a very simple and effective Anti Theft device.
