Rear Hub Retainer  
542110

## **Instructions Rear Hub Retainer**

### Note

1. This product can be used on cars that require an emergency brake. If not using stock emergency brake you can discard backing plate and related parts.
2. To install this product you will need to rebuild your banana arms.
3. When disassembling rear arms the wheel bearings will be destroyed so they must be replaced.

Use Porsche shop manual for instructions on rebuilding your banana arms.

### Installation of our retainer plates.

1. If using emergency brake bolt plate over factory plate.  
If not using emergency brake replace the stock plate with our plate.
2. Use the supplied bolts and washers.
3. Be sure bolt holes are clean so proper torque can be achieved.
4. Use red Loctite and torque bolts to 16 ft lbs.
